CRIMS SAFE SECURITY DOORS

Technical Info

Mesh

Crimsafe Security Doors feature Crimsafe Tensile-Tuff® Security Mesh, which is made of 304 Grade Stainless Steel.

Clamp System

Crimsafe Security Doors feature a patented Security Screw Clamp System. While inferior products simply glue or wedge mesh into a frame, Crimsafe sandwiches Tensile-Tuff® Security mesh between two serrated pieces of aluminium, then screws this mesh into place. This results in a strong, vice-like grip which has a much stronger tolerance to force than many competing products.

Triple Lock

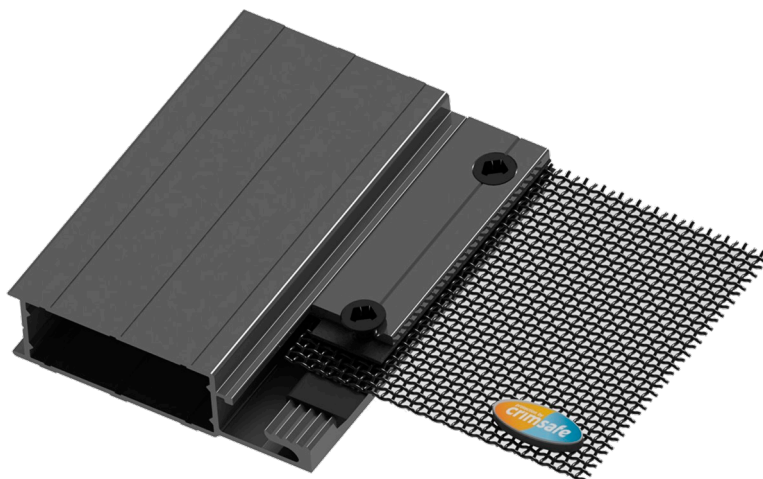

All Crimsafe Doors come fitted with a triple lock, which is manufactured from stainless steel for superior strength that meets all Australian quality standards

Mid-rails

For extra security, mid-rails can come standard with your Crimsafe Doors. Mid-rails help strengthen the resistance of your door's lock against a jemmy attack and protect the hinges by reducing an intruder's ability to lever it from the wall. Mid-rails also form a visual safety barrier.

Colour

The frame of Crimsafe Doors are available in a variety of different colours, ranging from shades of white and grey, to brown and blue. Various woodgrain tones are also available and offer a look that is impressively realistic. Crimsafe mesh is only available in black.

Cross section of mesh, frame and the screw clamp system.

Benefits
