

PRODUCT FACTSHEET

OUTDOOR LIVING

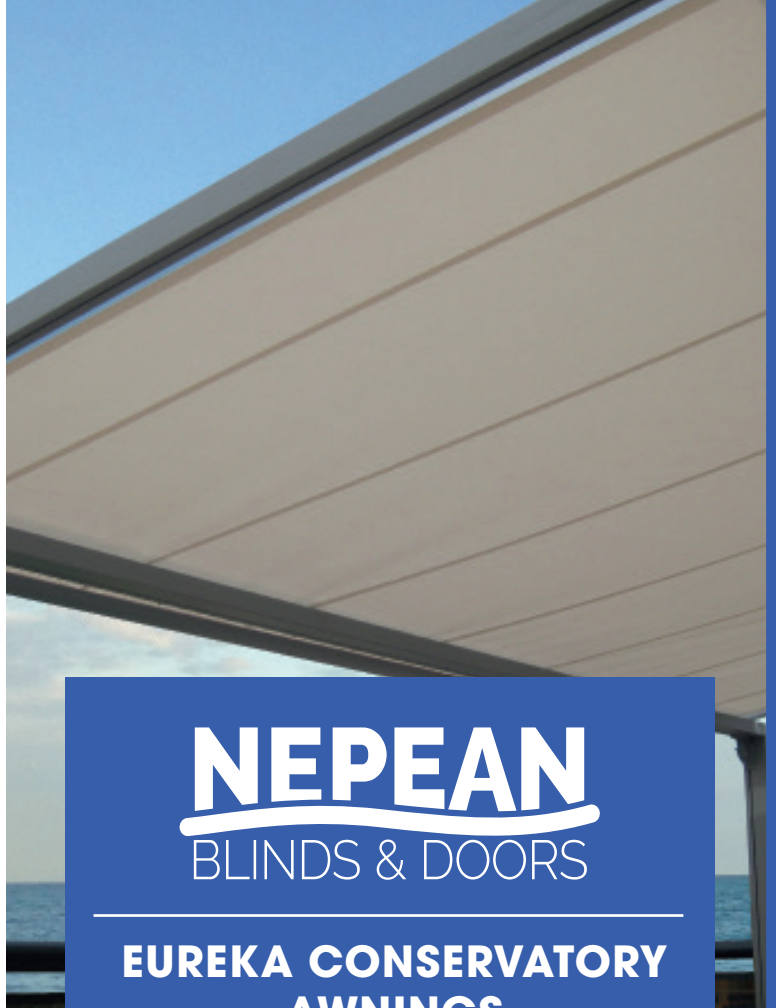

The Eureka Conservatory Awning is a temporary roof style awning, especially designed for outdoor entertainment spaces at residential or commercial buildings. These awnings can be fitted to an existing frame, or we can supply and install the awning and the frame for you. The awning is motorised for ease of use.

Technical Info

Operation

The Eureka Conservatory Awning is motorised and controlled using a remote, or connected to a Smart Home System. It runs on guides and retracts into a headbox when not in use.

Size

The Awning can be manufactured up to 5 x 5 metres in size, effectively covering medium to large outdoor entertaining areas or conservatories. Multiple Awnings can also be installed next to each other, utilising shared posts.

Gradient

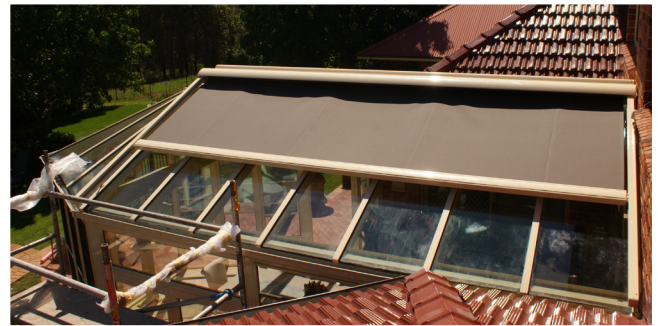

If the Awning remains extended during a light shower, the Awning's gradient of 5° to 45° ensures that rain flows away easily.

Strength

The Eureka Conservatory Awning uses a high tension system of belts and springs, ensuring the traction and tension of the fabric remain constant in any position. This system also increases the wind-resistance* of the awning.

Hardware Colour

The standard hardware colour for the track and headbox is white. Custom colour options are available.

Benefits

Retracts into a Headbox

When retracted, the Awning is discretely concealed in a headbox, protecting the fabric and giving you complete control of light and shade.

Child Safe

The lack of cords or cables adds an extra level of child-safety.

Automation

Can be automated for greater convenience.

Satisfaction Guaranteed

Quality installation is assured with our specialist team, and peace of mind with a 3 year warranty.

* It is advised that your awnings not be left out during strong winds, nor when your home is unoccupied.
