FLYSCREENS

Technical Info

Size

To accommodate most window openings, flyscreens are available in two different frame sizes: 9mm and 11mm.

Colour

Flyscreen frames are powder-coated and a range of colour options are available. This allows your Flyscreen frames to coordinate with the colour of your window frames.

Mesh

Flyscreens are available with two different types of mesh: fibre glass mesh and stainless steel mesh for a greater level of fire resistance.

Fibreglass Mesh

An economical choice. If properly maintained, it will not rust, rot or corrode.

Fire Mesh (Stainless Steel)

Thin, stainless steel that meets BAL-40 of the Australian Bushfire Standard. Aperture is approximately 1.5mm

Benefits

Allows Airflow

Flyscreens keep bugs out, but allow fresh air to pass through.

Mesh Choice

Choose between four different types of mesh to suit different needs.

Satisfaction Guaranteed

Quality installation is assured with our specialist team, and peace of mind with a 3 year warranty.
