FIXED STEEL AWNINGS

Technical Info

Installation

Steel Awnings are fixed to the wall, with a slope variance between 15° and 45° – the choice is yours. If you require a large Awning, we recommend the use of support posts to further increase the stability of the Awning.

Colour

Fixed Steel Awnings allow for a choice between fifteen different colours. The awnings can also have multiple colours fitted applied so that you can match any other existing colour schemes around the home.

Note: Colours should be used as a guide only. Outcome may vary across different screens/printers.
